CONVERSION

FOAM

The main applications of our Richguard®, Richtex™ and Richbond® ranges are for domestic upholstery. Using the latest Carpenter technology all types of seating, shaped arms, wings and headrests including fabricated items can be manufactured. Soft, medium and firm hardnesses are available in an extensive range of densities. Office, contract, medical and bedding foams are widely available.

FIBREFILL

Our Richfill® range of fibre-filled seats, backs and arms are mainly used in domestic upholstery. Using premium grade non-woven polypropylene or barrier cloth type covers filled with high quality branded hollow fibre to give a luxurious feel. Our innovative approach offers options of direct fill for mainly backs and arms and carded/rolled for seating applications.
